From EV doldrums to drumbeat

EV growth: from cloudy to high visibility in 3Q21 onward

During our FSSIA conference call, EA confirmed our positive view on its transformation from an electricity-driven company into an EV-centric firm with a strong net profit growth outlook starting in 3Q21 onward. First, EA plans to deliver 120 e-buses in 3Q21, 400 e-buses in 4Q21, and 3,000 e-buses and e-trucks combined in 2022. Second, we estimate that EA will generate a net profit of THB0.2b in 3Q21, THB0.6b in 4Q21, and THB3.5b in 2022 from its EV business. Third, EA will commence the commercial operation date of its 1GWh capacity battery plant phase 1 in Sep-21, which we project to generate a net profit of THB0.2b in 2021 and THB0.5b in 2022.

Four strengths to equip EA as a likely EV winner

Management indicated four key strengths that should grow EA's EV business in 2021-24. First, it should benefit from its first-mover advantage over both local and overseas competitors in terms of tax savings in the range of 27-47% and as the only player with a fully integrated EV value chain. Second, the strong annual demand for over 10,000 e-buses and e-trucks in Thailand, according to management, should be sufficient to fill EA's production capacity. Third, the government has implemented favourable policies, including tax exemptions for EV producers, tax barriers for import competitors, and a mandate for government agencies to deploy EVs as vehicles of choice in 2021 onward. Fourth, EA has high cost competitiveness, at up to 70% lower costs for energy and maintenance for EVs vs internal combustion engine vehicles.

Fast-charge batteries and chargers are key

According to management, EA's key product strengths that differentiate its EV products from its competitors are mainly its batteries and chargers. EA's fast-charge batteries with three to four parallel circuits (3C/4C) allow its charging stations to fully charge its batteries by up to 3-4x faster than the batteries produced by its competitors. At less than 2x the cost of normal chargers, EA's 4C chargers can offer a more financially attractive solution to its commercial customers vs its rivals, in our view.

From EV doldrums to drumbeat

Maintain BUY and our SoTP TP of THB76. We believe EA's share price is poised to rerate ahead of its significant net profit growth momentum from its EV ventures, which we estimate to start in 3Q21 onward.

Investment thesis

EA is Thailand's largest green energy player, operating through its three business segments of solar, wind and biodiesel; all touted to be the key pillars of Thailand's energy growth over the next 10 years. A biodiesel producer since 2012 with an 800k litre-per-day (lpd) capacity, EA later ventured into the solar and wind businesses. We believe EA's solar farms will be key earnings growth drivers, as they stand to gain from: 1) a high margin THB6.5/kWh adder; and 2) a 40% decline in the cost of solar panels since 2010.

EA has evolved from being a pure biodiesel player to emerge as one of Thailand's key players in renewable energy. While its biodiesel segment has been struggling at a mere 50% utilisation rate due to the country's oversupply, EA's solar and wind farm businesses have benefited from high-margin electricity tariffs and the declining cost of solar panels.

Company profile

Energy Absolute (EA) is a leading green energy company in Thailand with business interests in biodiesel, solar and wind energy. EA has expanded into the battery storage and electricity vehicle (EV) businesses, which we expect to be key earnings growth drivers post 2019.

www.energyabsolute.co.th

Principal activities (revenue, 2020)

- Methyl ester Biodiesel products - 38.5 %
- Pure glycerine products - 2.1 %
- Electricity from solar and wind power - 57.3 %
- Head office and others - 0.6 %
- Project consultation regarding alternative electric energy - -0.5 %

Source: Energy Absolute

Major shareholders

- Mr. Somphote Ahunai - 23.4 %
- Others - 76.6 %

Source: Energy Absolute

Catalysts

Higher utilisation rates of power plants and rising demand for electricity in Thailand are key potential growth drivers.

Risks to our call

Downside risks to our SoTP-based TP include: 1) lower-than-expected demand for electricity in Thailand; 2) lower crude prices; and 3) lower-than-expected demand for batteries.

Event calendar

Date	Event
Nov 2021	3Q21 results announcement

Key assumptions

	2021E	2022E	2023E
Dispatched power (GWh)	9,715	9,715	9,715
Capacity factor - wind farms (%)	26	26	27
Battery sales volume (GWh)	0.7	3.1	6.1
EV car sales (cars)	5,000	5,500	8,500

EV growth: from cloudy to high visibility in 3Q21 onward

During our FSSIA conference call, EA confirmed our positive view on its transformation from an electricity-driven company into an EV-centric firm with a strong net profit growth outlook starting in 3Q21 onward.

First, EA will deliver 120 e-buses in 3Q21, 400 e-buses in 4Q21, and 3,000 e-buses and e-trucks combined in 2022. Management confirmed that the 520 e-bus order in 2H21 is already secured and the 3,000 e-bus order backlog is now confirmed with clients, thereby reducing the demand risk to zero in 2022.

Second, we estimate that EA will generate a net profit of THB0.2b in 3Q21, THB0.6b in 4Q21, and THB3.5b in 2022 from its EV business. Our assumptions include 1) an average selling price of THB6m per e-bus and e-truck; 2) a net profit of THB1m-1.5m per EV; and 3) a sales volume of 120 e-buses in 3Q21, 400 in 4Q21, and 3,000 in 2022.

Third, EA will commence the commercial operation date of its 1GWh capacity battery plant phase 1 in Sep-21, which we project to generate a net profit of THB0.2b in 2021 and THB0.5b in 2022.

Four strengths to equip EA as a likely EV winner

Management indicated four key strengths that should grow EA's EV business in 2021-24.

First, it should benefit from its first-mover advantage over both local and overseas competitors in terms of tax savings in the range of 27-47% and as the only player with a fully integrated EV value chain from battery production, an EV assembly plant, and an extensive marketing network.

Second, the strong demand for over 10,000 e-buses and e-trucks in Thailand should be sufficient to fill EA's 3,000-EV production capacity in 2022-24.

Third, the government has implemented favourable policies to promote EVs in order to reduce carbon emissions, including tax exemptions for EV producers, tax barriers for import competitors, and a mandate for government agencies to deploy EVs as vehicles of choice in 2021 onward.

To make Thailand an EV production hub, the government has already started to incentivise investments for the potential shift away from manufacturing combustion engine vehicles, mainly to support the production of different types of EVs.

Over the past three years, the Board of Investment (BOI) has approved 13 EV-production projects with a combined capacity of 125,000 EVs per year and a total investment of about THB156b.

The BOI is now considering extra incentives for the production of EV pickups, buses, motorcycles, three-wheel vehicles and others, while the existing incentives include waiving the 8% excise tax rate until 2023, then collecting just 2% from 2024-25.

Fourth, EA has high cost competitiveness, at up to 70% lower costs for energy and maintenance for EVs vs internal combustion engine vehicles to achieve a five to six-year breakeven period to further strengthen EA's competitiveness.

Fast-charge batteries and chargers are key

According to management, EA's key product strengths that differentiate its EV products from its competitors are mainly its batteries and chargers. EA's fast-charge batteries with three to four parallel circuits (3C/4C) allow its charging stations to fully charge its batteries by up to 3-4x faster than the batteries produced by its competitors. At less than 2x the cost of normal chargers, EA's 4C chargers can offer a more financially attractive solution to its commercial customers vs its rivals, in our view.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 02-Sep-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
